CrossGrid application win the "best demo award" at the EGEE conference

During the Grid demo session at the 3rd EGEE conference in Athens (18th-22nd April 2005) the results from the CrossGrid project were presented by different presentation from consortium members and general dissemination was performed during the general EGEE exhibition at booth. After a general introduction about the target and results of the CrossGrid project, dedicated presentations were given about the CrossGrid Migrating Desktop, the CrossGrid approach for interactive MPI application on the Grid, the Flooding crisis support system, the GridBench tool and about the application performance monitoring tools OCM-G/G-PM. The interest at the demo was so high that each presentation was repeated twice. At least on representative of the EGEE external advisory committee (EAC) joined the CrossGrid presentations. A dedicated session about the Flooding crisis team support system was given to the whole EAC board. (see picture)

Ladislav Hluchy and the EGEE external advisory committee
during the demo of CrossGrid flood crisis team support system

At the conference dinner Fabrizio Gagliardi, project director of the EGEE project, announced the CrossGrid Flood crisis team support system as the best demo given during the EGEE demo and exhibition session. Ladislav Hluchy received the price for his development team and for the whole CrossGrid consortium (see picture).
